Benefits for advisors and teachers

Unifrog is a whole-school careers platform that helps careers advisors and teachers to track their students' progress and keep a record of all careers interactions to offer tailored support for every student.

Staff are able to provide feedback on applications, comment on students' activities, log career interviews, upload action plans, manage work experience placements, and download custom reports to evidence provision.

The lesson and teaching resources on Unifrog are mapped to the Gatsby Benchmarks, the CDI Framework, and PSHE Association learning objectives to help schools and colleges deliver quality CEIAG guidance for all year groups.

For support or to set up your Unifrog account please contact Careers
